## PROFILE

Experienced Mobile Application Developer with a strong track record of delivering scalable, high-quality cross-platform solutions. Specialized in Flutter development, API integration, and clean UI implementation, with hands-on experience across the full software development lifecycle from requirements to deployment and maintenance.

## WORK EXPERIENCE

**Parrophins Private Limited**  27/12/2022 - PRESENT
Mobile application developer

- Led end-to-end development of the "Alumean" alumni platform (mobile apps + staff/admin web) with news feeds, fundraising and donations, certificate request workflows, and committee information management, built using Flutter (Bloc, Clean Architecture), Node.js, MongoDB, and Firebase.
- Led development of "Parropass" institution app (mobile + admin web) featuring staff permission workflows and visitor management using Flutter, Bloc, PHP CodeIgniter, and Firebase.
- Led development of an in-house employee management app for Parrophins Pvt. Ltd., featuring OTP login, digital ID cards, leave/permission workflows, employee & client management, task tracking, job applicant resume review, built with Flutter (Bloc, Clean Architecture), PHP CodeIgniter, Node.js, MongoDB, and Firebase, and deployed on Play Store & App Store.
- Developed a cross-platform event registration app (mobile & web) with OTP login, ticket selection, EaseBuzz payment integration, and automated ticket generation using Flutter.
- Developed reusable staff and hostel management apps, replicated across 20+ institutions, featuring leave management, OTP login, WebView integration, gate pass, food tracking, and fee payments via EaseBuzz.
- Led delivery of 90+ Android/iOS apps and 16+ Flutter Web apps under Schoolphins, Collegephins, and ParroBees for students, staff, and parents.
- Integrated multiple payment gateways, including Paytm, Razorpay, EaseBuzz, and PhonePe.
- Technologies: Flutter, Flutter Bloc, Clean Architecture, Node.js, PHP CodeIgniter, MongoDB, Firebase
- Impact: Designed and delivered 100+ production apps, published and maintained on App Store and Play Store.
